Grass Planting Water Permeable Brick

1.Introduction: Grass Planting Water Permeable Brick is clay brick, which is a kind of clay brick. It is a low-temperature sintered brick with high-quality clay as the main raw material, quartz and feldspar as the aggregate and sintered at 800℃. The natural color difference produced in the sintering process of the product gives a soft and beautiful feeling. It is a green and environmental building material product

2.Features of Grass Planting Water Permeable Brick:

- 1) Good water and air permeability to improve the living conditions of plants and soil organisms on the urban ground
- 2) It can absorb water and heat and adjust the urban microclimate
- 3) Rich color, natural and simple

3. Application: Garden Construction

4. Color: red, yellow, gray, etc

5. Main parameters

ITEM	UNIT	TECHNCIAL INDEX
------	------	-----------------

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

Water absorption	%	8-10
Permeability	mm/s	≥ 20
Weatherability		No cracking at -45℃
Corrosion resistance		Fine

6. Case diagram

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

7.Good feedback of product use effect,the products have been exported to Japan, Oman,India.

8.We are a professional supplier, who can provide customers with free product technology, use and other issues.

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
